203641	Logical Reasoning	<p>Puja is the mother-in-law of Sunita who is wife of Rohit. Rohit whose father is Gajanan, is the father of Rupali. Dhanashree is the daughter of Puja.</p> <p>Find how Puja is related to Rupali?</p>	Raise / View Objection	
		315761		Grandson
		315762		Grandmother
		315763		Granddaughter
		315764		Aunt
		315765		Mother-in-law
		Correct Option: 315762		Candidate Response: 315762
203642	Logical Reasoning	<p>In a class, Samiksha ranks 12th from the top. Divya is 12 ranks ahead of Medha and 5 ranks behind Samiksha. Reshma who is 7th from the bottom is 29 ranks behind Medha. How many students are there in the class?</p>	Raise / View Objection	
		315766		61
		315767		57
		315768		66

315769	63
315770	64

Correct Option: 315770	Candidate Response: 315767
-------------------------------	-----------------------------------

203643 Logical Reasoning

There are 80 students admitted to a Music School. Some students can play only violin and some can play only harmonium. 20 children can play both violin and harmonium. If the number of students who can play violin is 30, then how many students can play harmonium? Also, how many can play only harmonium and how many can play only violin

Raise / View Objection

315771	70, 50 and 10 respectively
315772	60, 45 and 12 respectively
315773	65, 50 and 15 respectively
315774	68, 48 and 10 respectively
315775	72, 45 and 11 respectively

Correct Option: 315771	Candidate Response: 315772
-------------------------------	-----------------------------------

203644 Logical Reasoning

Given below are two statements, one is labelled as Assertion (A) and other one labelled as Reason (R).

Assertion (A) : Sound travels slower in gases than in solids

Reason (R) : Gases have a lower density than solids.

In light of the above statements, choose the *correct* answer from the options given below.

Raise / View Objection

315776	Both (A) and (R) are true and (R) is the correct explanation of (A).
315777	Both (A) and (R) are true but (R) is NOT the correct explanation of (A).

315778	(A) is true but (R) is false.
315779	(A) is false but (R) is true.
315780	Both(A) and (R) are false.

Correct Option: 315776	Candidate Response: 315777
-------------------------------	-----------------------------------

203645 Logical Reasoning

Given below is a statement and two assumptions. These assumptions may or may not be implicit in the statement.

Statement: The travel organizer has abandoned the hill trip.

Assumption I: Trip wasn't profitable for the travel organizer.

Assumption II: unsatisfactory climate lead to the abandonment of this trip.

Choose the correct option from below:

Raise / View Objection

315781	Only Assumption I follows
315782	Only Assumption II follows
315783	Neither Assumption I nor Assumption II follows
315784	Either Assumption I or Assumption II follows
315785	Both Assumption I and Assumption II follow

Correct Option: 315785	Candidate Response: 315782
-------------------------------	-----------------------------------

203646 Logical Reasoning

If all the letters of the word 'ALLITERATION' are arranged in the alphabetical order, then the position of how many letters will remain unchanged?

Raise / View Objection

315786	None
315787	One

315788	Three
315789	Two
315790	More than three

Correct Option: 315789 **Candidate Response:** 315787

203647

Logical Reasoning

<p>In a certain coding system, 'rbm std bro pus' means 'the puppy is beautiful', 'tnh pus dim std' means 'the sparrow is red', 'pus dim bro pus cus' means 'the sparrow has the puppy'. What is the code for 'has'?</p>	
315791	dim
315792	pus
315793	bro
315794	std
315795	cus

When a word and number arrangement machine is given an input line of words and numbers, it arranges them following a particular rule. The following is an illustration of input and the rearrangement.

INPUT- 3846 9231 7283 4731 8152 3285

STEP I- 3468 1239 2378 1347 1258 2358

STEP II - 1239 1258 1347 2358 2378 3468

STEP III- 23 25 34 35 37 46

STEP IV - 5 7 7 8 10 10

Step IV is the last step of the rearrangement. As per the rules followed in the above steps, find out in each of the following questions the appropriate steps for the given input

Input : 7925 4758 2538 5628 8561 7426 3625 6245 What will the addition of the numbers which is second, forth, sixth and eight from the left end in step IV ?

The film director Raturaj wants an actress for the lead role of Rosy who perfectly fits the description that appears in the original screenplay. He is not willing to consider actresses who do not resemble the character as she is described in the screenplay, no matter how talented they are. The screenplay describes Rosy as an average-sized, forty-something redhead, with deep brown eyes, very fair skin, and a brilliant smile. The casting agent has four actresses in mind.

1- Veena is a stunning red-haired beauty who is 5'9" and in her mid-twenties. Her eyes are brown and she has an olive complexion.

2- Rajani has red hair, big brown eyes, and a fair complexion. She is in her mid-forties and is 5'5".

3- Puja is 5'4" and of medium build. She has red hair, brown eyes, and is in her early forties.

4- Sulbha is a blue-eyed redhead in her early thirties. She's of very slight build and stands at 5'.

Which two actresses should the casting agent send to meet the director?

316051	Veena, Rajani
316052	Rajani, Puja

Read the information carefully and answer the questions below.

A weekly television show routinely stars six actors, Jeevan, Karan, Lalit, Manish, Nishant, and Omkar. Since the show has been on the air for a long time, some of the actors are good friends and some do not get along at all. In an effort to keep peace, the director sees to it that friends work together and enemies do not. Also, as the actors have become more popular, some of them need time off to do other projects. To keep the schedule working, the director has a few things she must be aware of:

1. Jeevan will only work on episodes on which Manish is working.
2. Nishant will not work with Karan under any circumstances.
3. Manish can only work every other week, in order to be free to film a movie
4. At least three of the actors must appear in every weekly episode.

Raise / View Objection

In a show about Lalit getting a job at the same company Jeevan already works for and Karan used to work for, all three actors will appear. Which of the following is true about the other actors who may appear?

316071	Manish, Nishant, and Omkar must all appear.
316072	Manish may appear and Nishant must appear.

Assertion (A) : Steel is used in the construction of buildings and bridges.

Reason (R) :Steel is more elastic and its elastic limit is high.

In light of the above statements, choose the *most appropriate* answer from the options given below.

Raise / View Objection

316126	Both (A) and (R) are correct and (R) is the correct explanation of (A).
316127	Both (A) and (R) are correct but (R) is the NOT the correct explanation of (A).
316128	(A) is correct but (R) is incorrect.
316129	(A) is incorrect but (R) is correct.
316130	Both A and R are not correct

Correct Option: 316126	Candidate Response: 316127

Raise / View Objection

Forest fires feed on decades-long accumulations of debris and leap from the tops of young trees into the branches of mature trees. Fires that jump from treetop to treetop can be devastating. In old-growth forests, however, the shade of mature trees keeps thickets of small trees from sprouting, and the lower branches of mature trees are too high to catch the flames.

This paragraph best supports the statement that

1. forest fire damage is reduced in old-growth forests.
2. small trees should be cut down to prevent forest fires.
3. mature trees should be thinned out to prevent forest fires.
4. forest fires do the most damage in old growth forests.
5. old-growth forests have a larger accumulation of forest debris.

Read the following passage carefully and answer the questions that follow.

There is now no denying that the new government takes office amid a clear economic slowdown. The first macro data set released showed an under-performing economy with GDP growth falling to 5.8% in the fourth quarter of 2018-19 and pulling down the overall growth for the fiscal to a five-year low of 6.8%. Growth in gross value added (GVA), which is GDP minus taxes and subsidies, fell to 6.6% in 2018-19, pointing to a serious slowdown. If further confirmation were needed, the growth in core sector output — a set of eight major industrial sectors — fell to 2.6% in April, compared to 4.7% in the same month last year. And finally, unemployment data, controversially suppressed by the Union government so far, showed that joblessness was at a 45-year high of 6.1% in 2017-18. These numbers highlight the challenges ahead in drafting the Budget for 2019-20. The economy is beset by a consumption slowdown as reflected in the falling sales of everything from automobiles to consumer durables, even fast-moving consumer goods. Private investment is not taking off, while government spending, which kept the economy afloat during the last NDA government, was cut back in the last quarter of 2018-19 to meet the fiscal deficit target of 3.4%. The good news is that inflation is undershooting the target and oil prices are on the retreat again. But the rural economy remains in distress, as seen by the 2.9% growth in agriculture last fiscal; the sector needs a good monsoon this year to bounce back. Overall economic growth in the first quarter of this fiscal is likely to remain subdued, and any improvement is unlikely until the late second quarter or the early third. There are not too many options before the new Finance Minister. In the near term, she has to boost consumption, which means putting more money in the hands of people. That, in turn, means cutting taxes, which is not easy given the commitment to rein in the fiscal deficit. In the medium term, Ms. Sitharaman has to take measures to boost private investment even as she opens up public spending again. These call for major reforms, starting with land acquisition and labour, corporate taxes by reducing exemptions and dropping rates, and nursing banks back to health. On the table will be options such as further recapitalisation of the ailing banks, and consolidation. The question, though, is where the money will come from. With tax revenues likely to be subdued owing to the slowdown, the Centre will have to look at alternative sources such as disinvestment. There may be little choice but to go big on privatisation. A rate cut by the Reserve Bank of India, widely expected this week, would certainly help boost sentiment. But it is the Budget that will really set the tone for the economy.

Private investment is not taking off, while government spending, which kept the economy afloat during the last NDA government, was cut back in the last quarter of 2018-19 to meet the fiscal deficit target of 3.4%. The good news is that inflation is undershooting the target and oil prices are on the retreat again. But the rural economy remains in distress, as seen by the 2.9% growth in agriculture last fiscal; the sector needs a good monsoon this year to bounce back. Overall economic growth in the first quarter of this fiscal is likely to remain subdued, and any improvement is unlikely until the late second quarter or the early third. There are not too many options before the new Finance Minister. In the near term, she has to boost consumption, which means putting more money in the hands of people. That, in turn, means cutting taxes, which is not easy given the commitment to rein in the fiscal deficit. In the medium term, Ms. Sitharaman has to take measures to boost private investment even as she opens up public spending again. These call for major reforms, starting with land acquisition and labour, corporate taxes by reducing exemptions and dropping rates, and nursing banks back to health. On the table will be options such as further recapitalisation of the ailing banks, and consolidation. The question, though, is where the money will come from. With tax revenues likely to be subdued owing to the slowdown, the Centre will have to look at alternative sources such as disinvestment. There may be little choice but to go big on privatisation. A rate cut by the Reserve Bank of India, widely expected this week, would certainly help boost sentiment. But it is the Budget that will really set the tone for the economy.

Which of the following, as per the passage, indicates a slowdown in the Indian economy?

I. Fall in sale levels of consumer durables

II. Negative growth in the core sector output

III. Fall in inflations levels

316546	Only I
316547	Only III

Read the following passage carefully and answer the questions that follow.

There is now no denying that the new government takes office amid a clear economic slowdown. The first macro data set released showed an under-performing economy with GDP growth falling to 5.8% in the fourth quarter of 2018-19 and pulling down the overall growth for the fiscal to a five-year low of 6.8%. Growth in gross value added (GVA), which is GDP minus taxes and subsidies, fell to 6.6% in 2018-19, pointing to a serious slowdown. If further confirmation were needed, the growth in core sector output — a set of eight major industrial sectors — fell to 2.6% in April, compared to 4.7% in the same month last year. And finally, unemployment data, controversially suppressed by the Union government so far, showed that joblessness was at a 45-year high of 6.1% in 2017-18. These numbers highlight the challenges ahead in drafting the Budget for 2019-20. The economy is beset by a consumption slowdown as reflected in the falling sales of everything from automobiles to consumer durables, even fast-moving consumer goods. Private investment is not taking off, while government spending, which kept the economy afloat during the last NDA government, was cut back in the last quarter of 2018-19 to meet the fiscal deficit target of 3.4%. The good news is that inflation is undershooting the target and oil prices are on the retreat again. Direction: Read the following passage carefully and answer the following question.

The world population is living, working, vacationing, increasingly conglomerating along the coasts, and standing on the front row of the greatest, most unprecedented, plastic waste tide ever faced. Washed out on our coasts in obvious and clearly visible form, the plastic pollution spectacle blatantly unveiling on our beaches is only the prelude of the greater story that unfolded further away in the world's oceans, yet mostly originating from where we stand: the land. For more than 50 years, global production and consumption of plastics have continued to rise. An estimated 299 million tons of plastics were produced in 2013, representing a 4 percent increase over 2012, and confirming an upward trend over the past years. In 2008, our global plastic consumption worldwide has been estimated at 260 million tons, and, according to a 2012 report by Global Industry Analysts, plastic consumption is to reach 297.5 million tons by the end of 2015. Plastic is versatile, lightweight, flexible, moisture resistant, strong, and relatively inexpensive. Those are the attractive qualities that lead us, around the world, to such a voracious appetite and over-consumption of plastic goods. However, durable and very slow to degrade, plastic materials that are used in the production of so many products all, ultimately, become waste with staying power. Our tremendous attraction to plastic, coupled with an undeniable behavioural propensity of increasingly over-consuming, discarding, littering and thus polluting, has become a combination of lethal nature. A simple walk on any beach, anywhere, and the plastic waste spectacle is present. All over the world, the statistics are ever growing, staggeringly. Tons of plastic debris (which by definition are waste that can vary in size from large containers, fishing nets to microscopic plastic pellets or even particles) is discarded every year, everywhere, polluting lands, rivers, coasts, beaches, and oceans. Published in the journal *Science* in February 2015, a study conducted by a scientific working group at UC Santa Barbara's National Center for Ecological Analysis and Synthesis (NCEAS), quantified the input of plastic waste from land into the ocean. The results: every year, 8 million metric tons of plastic end up in our oceans. It's equivalent to five grocery bags filled with plastic for every foot of coastline in the world. In 2025, the annual input is estimated to be about twice greater, or 10 bags full of plastic per foot of coastline. So the cumulative input for 2025 would be nearly 20 times the 8 million metric tons estimate – 100 bags of plastic per foot of coastline in the world!

As per the passage, which of the following statements are true?

1. Most of the plastic present in the ocean today has originated from the land.
2. In recent years, the production of plastics has declined.
3. Plastic pollution is present on almost every beach.

316586	Only 1
316587	Only 2
316588	None of 1, 2 and 3

Direction: Read the following passage carefully and answer the following questions.

India is considering inviting expressions of interest to sell Air India Ltd by the end of next month as the government aims to complete the transaction this year, people with knowledge of the matter said. "The government will conduct roadshows, as well as, be open to meet prospective buyers even before the expressions of interest are sought," the people said, declining to be identified as the discussions are private. "The process will likely allow the bidders to look at the accounts of the airline except for some portions that are confidential and also see the share purchase agreement," they said without providing details. "The potential bidders will have the option to make suggestions for changes in the sale terms during the process of expressing their interest in the deal," the people said. The government is looking to sell its entire stake in the carrier, they said. DS Malik, a spokesman of the Ministry of Finance, did not immediately answer two calls made to his mobile phone. Dhananjay Kumar, a spokesman of Air India, declined to comment. The plan is being prepared after the government's attempt to partially exit the carrier failed to attract any bidder last year. In her budget presentation for the current financial year, Finance Minister Nirmala Sitharaman said that the government will revive plans to sell Air India and the divestment would be part of the government's efforts to raise Rs 1,05,000 crore (\$15.3 billion) selling stakes in state-run companies. Air India, which is surviving on a Rs 30,000 crore taxpayer-funded bailout, has failed to maintain its market dominance as a slew of carriers including InterGlobe Aviation Ltd and SpiceJet Ltd started to offer ultra-cheap, on-time flights more than a decade ago. The state-run airline has total debts of \$8.4 billion and posted losses of more than Rs 7,600 crore last year, according to provisional estimates.

Which among the following has been shown as the main reason for the present situation of Air India in the passage?

316591	Air India does not have enough money to survive in the long run though it is trying to find out.
316592	Air India has lost all the deposits it had received from the government last year.
316593	Air India is in the process of earning deposits from the depositors and investors so that they are worried about the stake sale.
316594	Air India has got competition from other airlines and it has simply failed to live up to the same.
316595	Not any of the above

NOT ANY OF THE ABOVE

Read the following passage carefully and answer the questions given below.

The second-largest colony of emperor penguins in the world appears to be collapsing, after rough seas drowned all of its babies three winters in a row. The Halley Bay colony once accounted for 5 to 9% of the global emperor penguin population, according to the British Antarctic Survey (BAC), which reported the catastrophe. That amounted to about 15,000 to 24,000 adult breeding pairs. But in 2016, the sea-ice platform on which the colony was raising its babies collapsed during rough weather, throwing infant penguins unable to swim into the frigid water. In 2017 and 2018, the rough weather pattern repeated itself. The birds arrive at the site from their summer sea jaunts each April to breed; for the resulting chicks to survive, the site has to remain stable throughout the Southern Hemisphere’s winter, which lasts until December. By 2018, a handful of adults — a “few hundred,” or about 2 percent of the original population — turned up at the Halley Bay site, the researchers reported. The remaining colony appeared in disarray, with adults moving closer to the ice edge than is typical, and was difficult to count scattered among the roughened chunks of ice. The good news is that at least some of the colony appears to have moved, rather than died out. The Dawson[1]Lambton Glacier colony 34 miles (55 kilometers) to the south has significantly swelled in numbers since the devastation of Halley Bay, the BAC reported. That colony, which had hit a low of just 1,280 pairs in the 2015 season, swelled in each succeeding year. In 2016, it reached 5,315 pairs. In 2017, there were 11,117 pairs. And by 2018, a full 14,612 pairs set up camp at the site.

Which of the following is an antonym of “frigid” in the context of passage?

316601	Flexible
316602	Soft
316603	Lukewarm
316604	Rigid
316605	Hot

Read the passage and answer the questions that follow:

Once upon a time, there lived a farmer who had a little land. His name was Tuan, and he was a very kind and good-natured person. He lived in a hut on his land with his wife and children and earned by selling whatever crops he could produce on his small land. Tuan loved to help others. Whenever someone fell ill or needed something badly, Tuan was there to help that person. If someone died in the village, Tuan assisted the family members of the deceased person in whichever way he could. If anyone fell ill at night, Tuan was right beside the village doctor to help him prepare the medicines and tend to the sick. There seemed to be none who hated this man. He appeared to be loved by one and all. But there was one person who hated Tuan with all his heart. He was Juan, a neighbour of Tuan, who lived in the land next to him. A lazy person by nature, Juan hardly put in as much effort to cultivate his land as Tuan did to produce crops in his own. So, when the harvest season arrived every year, Juan found that he had very few crops to sell. Tuan, on the other hand, earned a handsome profit through the selling of his produces. One year, Juan could no longer contain his jealousy. Just days before Tuan was to reap his harvest, Juan set fire to his crops at night. Tuan was asleep at this time, and it was only the alertness of one of his other neighbors that saved much of his crops from being perished in the deadly flames of the fire that Juan had lighted. When the flames were doused, Tuan saw which direction the fire had started from. Juan's animosity towards him was unknown to Tuan. But he let the matters rest and decided to take action only if he saw Juan repeating his dastardly act once again. That year, Tuan managed to sell the rest of his crops at a good price, but he could not make much profit for a good part of his produces had been burnt. He had a heavy heart, but he did not like to tell anyone about it. Only days later, Tuan was awakened by the sound of lamentations. He went out to find a crowd beside Juan's hut. He rushed to find that Juan's son had fallen ill. He found that the village doctor was unable to provide a cure to his illness. Tuan knew what he had to do. He untied his own horse and rode it. Then he rushed to the town that was ten miles away and fetched a more experienced doctor who lived there. This doctor was able to guess the disease correctly and provided an exact cure for it. Within hours, the boy was found to sleep soundly and Tuan went with the doctor to take him back to the town. A day later, Juan went to Tuan's hut and began to weep bitterly. He confessed to his sins but was surprised when Tuan told him that he knew about it all. "You knew that I had set fire to your crops? And still you fetched the doctor for my son?" asked the astonished Juan. Tuan nodded and said, "I did what I knew was right. Could I do wrong just because you had done so?" Juan stood up and embraced Tuan. Both men were in tears and so were the others who stood by them. From that day, Juan changed himself. Within a year, he could produce much crops in his land through his hard work. When the others asked him how he had changed so much, he only replied, "It was the goodness and love of Tuan that transformed me."

Which of the following is/are true about Tuan?

I. He was a doctor along with being a farmer.

II. He was a good-natured and kind person.

III. He was a wealthy farmer who gave away his wealth to the needy.

Within hours, the boy was found to sleep soundly and Tuan went with the doctor to take him back to the town. A day later, Juan went to Tuan's hut and began to weep bitterly. He confessed to his sins but was surprised when Tuan told him that he knew about it all. "You knew that I had set fire to your crops? And still you fetched the doctor for my son?" asked the astonished Juan. Tuan nodded and said, "I did what I knew was right. Could I do wrong just because you had done so?" Juan stood up and embraced Tuan. Both men were in tears and so were the others who stood by them. From that day, Juan changed himself. Within a year, he could produce much crops in his land through his hard work. When the others asked him how he had changed so much, he only replied, "It was the goodness and love of Tuan that transformed me."

Which of the following is/are a/some ways in which Juan transformed himself?

I. He began to work hard on his crops.

II. He became more helpful towards people.

III. He started a small charity in Tuan's name.

316616	Only I
316617	Only III
316618	Only I and II
316619	Only II and III
316620	All I, II and III

Correct Option: 316616

Read the passage and answer the questions that follow:

Once upon a time, there lived a farmer who had a little land. His name was Tuan, and he was a very kind and good-natured person. He lived in a hut on his land with his wife and children and earned by selling whatever crops he could produce on his small land. Tuan loved to help others. Whenever someone fell ill or needed something badly, Tuan was there to help that person. If someone died in the village, Tuan assisted the family members of the deceased person in whichever way he could. If anyone fell ill at night, Tuan was right beside the village doctor to help him prepare the medicines and tend to the sick. There seemed to be none who hated this man. He appeared to be loved by one and all. But there was one person who hated Tuan with all his heart. He was Juan, a neighbour of Tuan, who lived in the land next to him. A lazy person by nature, Juan hardly put in as much effort to cultivate his land as Tuan did to produce crops in his own. So, when the harvest season arrived every year, Juan found that he had very few crops to sell. Tuan, on the other hand, earned a handsome profit through the selling of his produces. One year, Juan could no longer contain his jealousy. Just days before Tuan was to reap his harvest, Juan set fire to his crops at night. Tuan was asleep at this time, and it was only the alertness of one of his other neighbors that saved much of his crops from being perished in the deadly flames of the fire that Juan had lighted. When the flames were doused, Tuan saw which direction the fire had started from. Juan's animosity towards him was unknown to Tuan. But he let the matters rest and decided to take action only if he saw Juan repeating his dastardly act once again. That year, Tuan managed to sell the rest of his crops at a good price, but he could not make much profit for a good part of his produces had been burnt. He had a heavy heart, but he did not like to tell anyone about it. Only days later, Tuan was awakened by the sound of lamentations. He went out to find a crowd beside Juan's hut. He rushed to find that Juan's son had fallen ill. He found that the village doctor was unable to provide a cure to his illness. Tuan knew what he had to do. He untied his own horse and rode it. Then he rushed to the town that was ten miles away and fetched a more experienced doctor who lived there. This doctor was able to guess the disease correctly and provided an exact cure for it. Within hours, the boy was found to sleep soundly and Tuan went with the doctor to take him back to the town. A day later, Juan went to Tuan's hut and began to weep bitterly. He confessed to his sins but was surprised when Tuan told him that he knew about it all. "You knew that I had set fire to your crops? And still you fetched the doctor for my son?" asked the astonished Juan. Tuan nodded and said, "I did what I knew was right. Could I do wrong just because you had done so?" Juan stood up and embraced Tuan. Both men were in tears and so were the others who stood by them. From that day, Juan changed himself. Within a year, he could produce much crops in his land through his hard work. When the others asked him how he had changed so much, he only replied, "It was the goodness and love of Tuan that transformed me."

What did Tuan do when he discovered Juan's son was ill?

316621	He called the village doctor who lived a few houses away.
316622	He went back to his house thinking Juan deserved what he got.
316623	He rode out to the nearest hospital along with Juan's son to get him treated.
316624	He went back to his house to get some medicines which could help Juan's son
316625	He rode to the nearest town to get a better doctor.

Read the following passage carefully and answer the question that follows.

For generations, companies have been selling fair skin to young Indian women, promising better marriage and employment prospects. However, over the last few years, men have become a favoured target audience. This followed the realisation that the Indian alpha male, denied a choice in malespecific grooming products, had been using women's fairness creams all along. Until the mid-2000s, deodorants and shaving creams were the only grooming products advertised for men. But India's largest consumer goods companies sensed an opportunity, and launched a slew of fairness products for male consumers.

In India, as in other parts of the world, light skin is the culturally accepted and endorsed form of beauty, and children absorb this message at a young age. According to a 2015 research report by Nielsen, urban Indian men believe that fair skin can improve professional prospects. The cultural pressure to look fair, argues Kiran Khalap, branding expert and founder at communications consultancy Chlorophyll, is something inherent in our society, not manufactured by companies. "And it is certainly not restricted to India: China and Japan have had skin-whitening products for centuries, well before they met Western 'white' people," he said. However, there is a growing awareness among consumers that companies are exploiting their insecurities, and critics have taken some of the biggest fairness brands, and the celebrities who endorse them, to task for their casual discrimination.

Earlier this month, Bollywood actor Abhay Deol took to Facebook to trounce his fellow actors who earn millions from endorsing fairness creams. This comes a few years after actress Nandita Das launched the "Dark is Beautiful" campaign to encourage Indians to embrace a wider definition of beauty. These efforts are slowly making a difference, increasing awareness and encouraging consumers to take pride in their natural skin tones. That means Indian companies will eventually have to change their approach. "My sense is that brands will wake up to the new reality, and you will see propositions reworked around clearer skin (and) glow, rather than pure fairness," Leo Burnett's Sinha said.

Rajesh Krishnamurthy, business head for the consumer product division at The Himalaya Drug Company, believes that over time the men's grooming category will evolve to include a wider range of products, including those for normal skin, just like in the women's skin care category. "Companies are increasingly realising that you cannot continue to bullshit consumers anymore; these are educated young men who will question what you sell to them," said Shantanu Deshpande, co-founder and CEO of the male-grooming startup Bombay Shaving Company.

What is the central idea of the passage?

A. Though people endorsed skin fairness products, they are now realising that they are being taken for a ride by such products.

B. Only men ardently use whitening creams to boost their personality.

C. The brand marketing of fairness product companies are evolving to appease the target audience of India.

D. Brands are frivolous when it comes to campaigning of their beauty products.

E. Not any of the above

316731	A
316732	B
316733	C
316734	D
316735	E

Correct Option: 316731

Earlier this month, Bollywood actor Abhay Deol took to Facebook to trounce his fellow actors who earn millions from endorsing fairness creams. This comes a few years after actress Nandita Das launched the "Dark is Beautiful" campaign to encourage Indians to embrace a wider definition of beauty. These efforts are slowly making a difference, increasing awareness and encouraging consumers to take pride in their natural skin tones. That means Indian companies will eventually have to change their approach. "My sense is that brands will wake up to the new reality, and you will see propositions reworked around clearer skin (and) glow, rather than pure fairness," Leo Burnett's Sinha said.

Rajesh Krishnamurthy, business head for the consumer product division at The Himalaya Drug Company, believes that over time the men's grooming category will evolve to include a wider range of products, including those for normal skin, just like in the women's skin care category. "Companies are increasingly realising that you cannot continue to bullshit consumers anymore; these are educated young men who will question what you sell to them," said Shantanu Deshpande, co-founder and CEO of the male-grooming startup Bombay Shaving Company.

What were the findings of the 2015 research report by Nielsen?

- A. Indian urban men presumed that being fair enhanced their professional opportunities.
- B. Indian urban men believed that being fair would give them better marriage and employment contracts.
- C. Indian urban men would eventually question the logic behind male-grooming product advertisements.
- D. Indian urban men do not endorse the concept of fairness helping them in their personal and professional life.
- E. Not any of the above

Read the following passage carefully and answer the question that follows.

For generations, companies have been selling fair skin to young Indian women, promising better marriage and employment prospects. However, over the last few years, men have become a favoured target audience. This followed the realisation that the Indian alpha male, denied a choice in malespecific grooming products, had been using women's fairness creams all along. Until the mid-2000s, deodorants and shaving creams were the only grooming products advertised for men. But India's largest consumer goods companies sensed an opportunity, and launched a slew of fairness products for male consumers.

In India, as in other parts of the world, light skin is the culturally accepted and endorsed form of beauty, and children absorb this message at a young age. According to a 2015 research report by Nielsen, urban Indian men believe that fair skin can improve professional prospects. The cultural pressure to look fair, argues Kiran Khalap, branding expert and founder at communications consultancy Chlorophyll, is something inherent in our society, not manufactured by companies. "And it is certainly not restricted to India: China and Japan have had skin-whitening products for centuries, well before they met Western 'white' people," he said. However, there is a growing awareness among consumers that companies are exploiting their insecurities, and critics have taken some of the biggest fairness brands, and the celebrities who endorse them, to task for their casual discrimination.

4. With reference to the passage, why exactly was "Dark is beautiful" campaign initiated?

A. To motivate Indians to ditch their liking for the fair skin and accept their inherent beauty.

B. To throw light on the sinister intentions of fairness brands.

C. To make sure that Indians do not fall prey to misleading beauty product advertisements.

D. To encourage Indians to be sympathetic towards people with other skin tones.

Read the passage carefully and answer the question that follows.

Emotions often trump reason. The Cauvery water dispute is turning out to be less about water and irrigation and more about linguistic chauvinism and regional identity. Nothing else can explain the mindless violence in Karnataka and Tamil Nadu over the Supreme Court order asking the former to release water to the latter, keeping in view the distress situation in both States in a season of deficit rainfall. Many of the acts of violence have been perpetuated in the two States by chauvinistic, fringe organizations that have little to do with the farming community or its interests. It is clear that there is insufficient water in Karnataka's reservoirs to meet the full irrigation needs of both states. The point of the Supreme Court order was to make the States share their distress and not to magically fulfil the needs of farmers on both sides. But political parties and some media houses, especially regional language television channels, have sought to portray the issue as one that pits the people of one State against that of the other. Indeed, the two major national parties, the Congress and the Bharatiya Janata Party, have taken different stands in the two States on this issue. No party or State government appears to believe it can afford to be seen as taking even so much as a conciliatory step toward defusing the crisis. On some previous occasions when Karnataka released water in a distress year the State government did so quietly so as to not give chauvinistic elements any opportunity to inflame passions. Cauvery is an inter-State dispute, but this is no reason to turn the issue into a raging controversy that draws the peoples of the two States into confrontation!

What was the purpose behind the Supreme Court's order regarding Cauvery water?

- A. To solve the irrigation needs faced by the farmers of Tamil Nadu.
- B. That the two states share their distress due to shortage of water.
- C. To fulfil the needs of the farmers in both states.
- D. To solve the irrigation needs faced by the farmers of Karnataka.
- E. Not any of the above

316756	A
316757	B
316758	C
316759	D
316760	E

Correct Option: 316757

Candidate Response: 316757
