12 August 2026

To the Graduate Admissions Committee,

It is my pleasure to recommend Ms. Priya Sharma for the MS in Computer Science program at your university. I have taught Priya in Data Structures and Machine Learning, and supervised her final-year project over the past two years, and she ranks among the top 3% of students I have taught in a decade.

Priya has exceptional technical depth. She is fluent in Python, C++ and Java, and her grasp of algorithms is well above her peers, reflected in the highest grade in my Data Structures course. She consistently approaches problems analytically and writes clean, well-documented code.

For her final-year project, Priya built a speech-to-text system for regional Indian languages, training deep learning models that reached 92% accuracy. She independently handled data collection, model design and evaluation, and presented the work at a national student conference, showing rare initiative and research maturity.

Beyond her technical skill, Priya is a thoughtful communicator and a reliable team member who mentored juniors in our coding lab. Her curiosity and discipline make her ideally suited to graduate research in artificial intelligence.

I recommend Priya without reservation and am confident she will excel in your program. Please feel free to contact me for any further information.

Sincerely,

Dr. Anil Kumar

Professor, Department of Computer Science, ABC Institute of Technology
