Relation Between Humans and their Physical Environment

You are already aware of the fact that the core concern of geography as a discipline is to understand the earth as home of human beings and to study all those elements, which have sustained them. Thus, emphasis is on study of nature and human beings. You will realise that geography got subjected to dualism and the wide-ranging debates started whether geography as a discipline should be a *law making/theorising* (nomothetic) or *descriptive* (idiographic).

Human beings interact with their physical environment with the help of technology. It is not important what human beings produce and create but it is extremely important 'with the help of what tools and techniques do they produce and create'.

Technology indicates the level of cultural development of society. Human beings were able to develop technology after they developed better understanding of natural laws.

The core concern of geography as a discipline is which one of the following ? Choose the most appropriate option.

(A) Earth as home of human beings
(B) Earth as home of plant kingdom
(C) Earth as home of animal world
(D) Earth as home of landforms

19. Read the given passage carefully and answer the questions that follow :

Human Development

Access to resources, health and education are the key areas in human development. Suitable indicators have been developed to measure each of these aspects.

Very often, people do not have the capability and freedom to make even basic choices. This may be due to their inability to acquire knowledge, their material poverty, social discrimination, inefficiency of institutions and other reasons. This prevents them from leading healthy lives, being able to get educated or to have the means to live a decent life.

Building people's capabilities in the areas of health, education and access to resources is therefore, important in enlarging their choices. If people do not have capabilities in these areas, their choices also get limited.

For example, an uneducated child cannot make the choice to be a doctor because her choice has got limited by her lack of education. Similarly, very often poor people cannot choose to take medical treatment for disease because their choice is limited by their lack of resources.

19.1. Name any two areas of human development.

19.2. Mention any two reasons which lead to lack of capability and freedom to make even basic choices.

19.3. Explain the condition in which the choices of people are restricted.
