Question Number : 1 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

If p and q are non-zero real numbers and $\alpha^3 + \beta^3 = -p, \alpha\beta = q$, then a quadratic equation whose roots are $\frac{\alpha^2}{\beta}, \frac{\beta^2}{\alpha}$ is :

(1) $px^2 - qx + p^2 = 0$

(2) $qx^2 + px + q^2 = 0$

(3) $px^2 + qx + p^2 = 0$

(4) $qx^2 - px + q^2 = 0$

Question Number : 2 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

Let z satisfy $|z| = 1$ and $z = 1 - \bar{z}$. Statement 1 : z is a real number. Statement 2 : Principal argument of z is $\frac{\pi}{3}$

(1) Statement 1 is true Statement 2 is true; Statement 2 is a correct explanation for Statement 1 .

(2) Statement 1 is false; Statement 2 is true

(3) Statement 1 is true, Statement 2 is false.

(4) Statement 1 is true; Statement 2 is true; Statement 2 is not a correct explanation for Statement 1 .

Question Number : 3 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

5 - digit numbers are to be formed using $2, 3, 5, 7, 9$ without repeating the digits. If p be the number of such numbers that exceed 20000 and q be the number of those that lie between 30000 and 90000 , then $p : q$ is:

(1) $6 : 5$

(2) $3 : 2$

(3) $4 : 3$

(4) $5 : 3$

Question Number : 4 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

Given a sequence of 4 numbers, first three of which are in G.P. and the last three are in A.P. with common difference six. If first and last terms of this sequence are equal, then the last term is :

(1) 16 (2) 8

(3) 4 (4) 2

Question Number : 5 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

The value of $1^2+3^2+5^2+.....+25^2$ is :

(1) 2925 (2) 1469

(3) 1728 (4) 1456

Question Number : 6 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

If for positive integers $r>1, n>2$, the coefficients of the $(3r)^{\text{th}}$ and $(r+2)^{\text{th}}$ powers of x in the expansion of $(1+x)^{2n}$ are equal, then n is equal to:

(1) $2r+1$ (2) $2r-1$

(3) $3r$ (4) $r+1$

Question Number : 7 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

Let $\mathrm{A}=\{\theta:\sin(\theta)=\tan(\theta)\}$ and $\mathrm{B}=(\theta:\cos(\theta)=1\backslash\}$ be two sets. Then:

(1) $\mathrm{A}=\mathrm{B}$ (2) $A \not\subset B$

(3) $B \not\subset A$ (4) $A \subset B$ and $B-A \neq \phi$

Question Number : 8 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

If the image of point $\mathrm{P}(2,3)$ in a line L is $\mathrm{Q}(4,5)$, then the image of point $\mathrm{R}(0,0)$ in the same line is:

(1) $(2,2)$ (2) $(4,5)$

(3) $(3,4)$ (4) $(7,7)$

Question Number : 9 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

Let $x \in (0,1)$. The set of all x such that $\sin^{-1}x > \cos^{-1}x$, is the interval:

(1) $\left(\frac{1}{2}, \frac{1}{\sqrt{2}}\right)$ (2) $\left(\frac{1}{\sqrt{2}}, 1\right)$

(3) $(0,1)$ (4) $\left(0, \frac{\sqrt{3}}{2}\right)$

Question Number : 10 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

Statement 1: The only circle having radius $\sqrt{10}$ and a diameter along line $2x+y=5$ is $x^2+y^2-6x+2y=0$. Statement 2 : $2x+y=5$ is a normal to the circle $x^2+y^2-6x+2y=0$.

(1) Statement 1 is false; Statement 2 is true.

(2) Statement 1 is true; Statement 2 is true, Statement 2 is a correct explanation for Statement 1.

(3) Statement 1 is true; Statement 2 is false.

(4) Statement 1 is true; Statement 2 is true; Statement 2 is not a correct explanation for Statement 1.

Question Number : 11 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

If a circle of unit radius is divided into two parts by an arc of another circle subtending an angle 60° on the circumference of the first circle, then the radius of the arc is:

(1) $\sqrt{3}$ (2) $\frac{1}{2}$

(3) 1 (4) None of these

Question Number : 12 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

A point on the ellipse, $4x^2+9y^2=36$, where the normal is parallel to the line, $4x-2y-5=0$, is :

(1) $\left(\frac{9}{5}, \frac{8}{5}\right)$ (2) $\left(\frac{8}{5}, -\frac{9}{5}\right)$

(3) $\left(-\frac{9}{5}, \frac{8}{5}\right)$ (4) $\left(\frac{8}{5}, \frac{9}{5}\right)$

Question Number : 13 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

Consider the system of equations : $x+ay=0, y+az=0$ and $z+ax=0$. Then the set of all real values of ' a ' for which the system has a unique solution is:

(1) $\mathrm{R}-\{1\}$ (2) $\mathrm{R}-\{-1\}$

(3) $\{1,-1\}$ (4) $\{1,0,-1\}$

Question Number : 14 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

Let p and q be any two logical statements and $\mathrm{r}: \mathrm{p} \rightarrow (\sim p \vee q)$. If r has a truth value F, then the truth values of p and q are respectively:

(1) F, F (2) T, T

(3) T, F (4) F, T

Question Number : 15 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

In a set of $2n$ observations, half of them are equal to ' a ' and the remaining hall are equal to ' $-\mathrm{a}$ ' '. If the standard deviation of all the observations is 2 ; then the value of $|a|$ is :

(1) 2 (2) $\sqrt{2}$

(3) 4 (4) $2\sqrt{2}$

Question Number : 16 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

A common tangent to the conics $x^2=6y$ and $2x^2-4y^2=9$ is:

(1) $x-y=\frac{3}{2}$ (2) $x+y=1$

(3) $x+y=\frac{9}{2}$ (4) $x-y=1$

Question Number : 17 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

Let $S=\left\{\begin{pmatrix} a_{11} & a_{12} \\ a_{21} & a_{22} \end{pmatrix} : a_{ij} \in \{0,1,2\}, a_{11}=a_{22}\right\}$ Then the number of non-singular matrices in the set S is :

(1) 27 (2) 24

(3) 10 (4) 20

Question Number : 18 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

Consider the function : $f(x) = [x] + |1 - x|, -1 \le x \le 3$ where $[x]$ is the greatest integer function. Statement 1: f is not continuous at $x = 0, 1, 2$ and 3 Statement 2:f(x)= $= \begin{cases} -x, & -1 \le x < 0 \\ 1 - x, & 0 \le x < 1 \\ 1 + x, & 1 \le x < 2 \\ 2 + x, & 2 \le x \le 3 \end{cases}$

(1) Statement 1 is true; Statement 2 is false,

(2) Statement 1 is true; Statement 2 is true; Statement 2 is not correct explanation for Statement 1.

(3) Statement 1 is true; Statement 2 is true; Statement It is a correct explanation for Statement 1.

(4) Statement 1 is false; Statement 2 is true.

Question Number : 19 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

A spherical balloon is being inflated at the rate of $35\text{cc}/\text{min}$. The rate of increase in the surface area (in cm^2/min.) of the balloon when its diameter is 14 cm, is :

(1) 10

(2) $\sqrt{10}$

(3) 100

(4) $10\sqrt{10}$

Question Number : 20 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

Let $f(1) = -2$ and $f'(x) \ge 4.2$ for $1 \le x \le 6$. The possible value of $f(6)$ lies in the interval :

(1) $[15, 19)$

(2) $(-\infty, 12)$

(3) $[12, 15)$

(4) $[19, \infty)$

Question Number : 21 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

If an equation of a tangent to the curve, $y - \cos(x + f), -1 - 1 \le x \le 1 + \pi$, is $x + 2y = k$ then k is equal to :

(1) 1

(2) 2

(3) $\frac{\pi}{4}$

(4) $\frac{\pi}{2}$

Question Number : 22 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

If the integral

$$\int \frac{\cos 8x + 1}{\cot 2x - \tan 2x} dx = A \cos 8x + k$$

where k is an arbitrary constant, then A is equal to:

(1) $-\frac{1}{16}$

(2) $\frac{1}{16}$

(3) $\frac{1}{8}$

(4) $-\frac{1}{8}$

Question Number : 23 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

For $0 \le x \le \frac{\pi}{2}$, the value of

$$\int_0^{\sin^2 x} \sin^{-1}(\sqrt{t}) dt + \int_0^{\cos^2 x} \cos^{-1}(\sqrt{t}) dt \text{ equals :}$$

(1) $\frac{\pi}{4}$

(2) 0

(3) 1

(4) $-\frac{\pi}{4}$

Question Number : 24 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

Let $f:[-2,3] \to [0,\infty)$ be a continuous function such that $f(1-x)=f(x)$ for all $x \in [-2,3]$. If R_1 is the numerical value of the area of the region bounded by $y=f(x), x=-2, x=3$ and the axis of x and $R_2=\int_{-2}^{3} x f(x)dx$, then :

(1) $3R_1=2R_2$ (2) $2\mathrm{R}_1=3\mathrm{R}_2$

(3) $\mathrm{R}_1=\mathrm{R}_2$ (4) $\mathrm{R}_1=2\mathrm{R}_2$

Question Number : 25 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

The equation of the curve passing through the origin and satisfying the differential equation $\left(1+x^2\right)\frac{dy}{dx}+2xy=4x^2$ is

(1) $\left(1+x^2\right)y=x^3$ (2) $3\left(1+x^2\right)y=2x^3$

(3) $\left(1+x^2\right)y=3x^3$ (4) $3\left(1+x^2\right)y=4x^3$

Question Number : 26 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

Let $\vec{a}=2\hat{i}+\hat{j}-2\hat{k}, \vec{b}=\hat{i}+\hat{j}$. If $\vec{c}$ is a vector such that $\vec{a} \bullet \vec{c}=|\vec{c}|, |\vec{c}-\vec{a}|=2\sqrt{2}$ and the angle between $\vec{a}\times\vec{b}$ and $\vec{c}$ is 30°, then $|(\vec{a}\times\vec{b})\times\vec{c}|$ equals:

(1) $\frac{1}{2}$ (2) $\frac{3\sqrt{3}}{2}$

(3) 3 (4) $\frac{3}{2}$

Question Number : 27 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

Let $A(-3,2)$ and $B(-2,1)$ be the vertices of a triangle ABC. If the centroid of this triangle lies on the line $3x+4y+2=0$, then the vertex C lies on the line :

(1) $4x+3y+5=0$ (2) $3x+4y+3=0$

(3) $4x+3y+3=0$ (4) $3x+4y+5=0$

Question Number : 28 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

Let ABC be a triangle with vertices at points A $(2,3,5)$, B $(-1,3,2)$ and C$(\lambda,5,\mu)$ in three dimensional space. If the median through A is equally inclined with the axes, then (λ,μ) is equal to:

(1) $(10,7)$ (2) $(7,5)$

(3) $(7,10)$ (4) $(5,7)$

Question Number : 29 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

The equation of a plane through the line of intersection of the planes $x+2y=3, y-2z+1=0$, and perpendicular to the first plane is :

(1) $2x-y-10z=9$ (2) $2x-y+7z=11$

(3) $2x-y+10z=11$ (4) $2x-y-9z=10$

Question Number : 30 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

If the events A and B are mutually exclusive events such that $\mathrm{P(A)}=\frac{3x+1}{3}$ and $\mathrm{P(B)}=\frac{1-x}{4}$, then the set of possible values of x lies in the interval :

(1) $[0,1]$ (2) $\left[\frac{1}{3},\frac{2}{3}\right]$

(3) $\left[-\frac{1}{3},\frac{5}{9}\right]$ (4) $\left[-\frac{7}{9},\frac{4}{9}\right]$

A block is placed on a rough horizontal plane. A time dependent horizontal force $\mathrm{F} = \mathrm{kt}$ acts on the block, where k is a positive constant. The acceleration - time graph of the block is :

(1) 

(2) 

(3) 

(4) 

Question Number : 32 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

The maximum range of a bullet fired from a toy pistol mounted on a car at rest is $R_0 = 40\ \mathrm{m}$. What will be the acute angle of inclination of the pistol for maximum range when the car is moving in the direction of firing with uniform velocity $\mathrm{v} = 20\ \mathrm{m/s}$ on a horizontal surface? $\left(\mathrm{g} = 10\ \mathrm{m/s^2}\right)$

(1) 30°

(2) 60°

(3) 75°

(4) 45°

Question Number : 33 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

A wind-powered generator converts wind energy into electrical energy. Assume that the generator converts a fixed fraction of the wind energy intercepted by its blades into electrical energy. For wind speed v, the electrical power output will be most likely proportional to

(1) v^4

(2) v^2

(3) v

(4) v^3

Question Number : 34 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

A ring of mass M and radius R is rotating about its axis with angular velocity ω. Two identical bodies each of mass m are now gently attached at the two ends of a diameter of the ring. Because of this, the kinetic energy loss will be :

(1) $\frac{m(M+2m)}{M}\omega^2R^2$

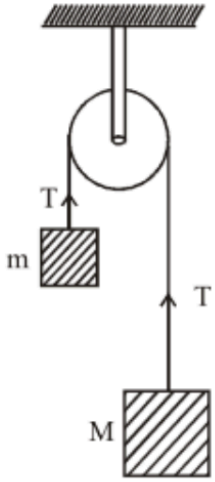

(2) $\frac{Mm}{(M+m)}\omega^2R^2$

(3) $\frac{Mm}{(M+2m)}\omega^2R^2$

(4) $\frac{(M+m)M}{(M+2m)}\omega^2R^2$

Question Number : 35 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

Two blocks of masses m and M are connected by means of a metal wire of cross-sectional area A passing over a frictionless fixed pulley as shown in the figure. The system is then released. If $M = 2\ m$, then the stress

produced in the wire is:

(1) $\frac{2mg}{3A}$

(2) $\frac{4mg}{3A}$

(3) $\frac{mg}{A}$

(4) $\frac{3mg}{4A}$

Question Number : 36 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

In an experiment, a small steel ball falls through a liquid at a constant speed of 10 cm/s. If the steel ball is pulled upward with a force equal to twice its effective weight, how fast will it move upward ?

(1) 5 cm/s

(2) Zero

(3) 10 cm/s

(4) 20 cm/s

Question Number : 37 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

A mass of 50 g of water in a closed vessel, with surroundings at a constant temperature takes 2 minutes to cool from 30°C to 25°C. A mass of 100 g of another liquid in an identical vessel with identical surroundings takes the same time to cool from 30°C to 25°C. The specific heat of the liquid is : (The water equivalent of the vessel is 30 g.)

(1) 2.0kcal/kg

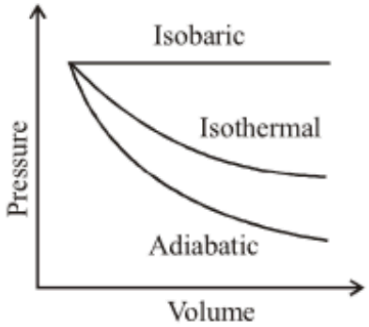

(2) 7kcal/kg

(3) 3kcal/kg

(4) 0.5kcal/kg

Question Number : 38 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

A sample of gas expands from V_1 to V_2. In which of the following, the work done will be greatest?

(1) Same in all processes

(2) Isobaric process

(3) Isothermal process

(4) Adiabatic process

Question Number : 39 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

In the isothermal expansion of 10 g of gas from volume V to 2 V the work done by the gas is 575 J. What is the root mean square speed of the molecules of the gas at that temperature?

(1) $398\ \mathrm{m/s}$ (2) $520\ \mathrm{m/s}$

(3) $499\ \mathrm{m/s}$ (4) $532\ \mathrm{m/s}$

Question Number : 40 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

A uniform cylinder of length L and mass M having cross-sectional area A is suspended, with its length vertical, from a fixed point by a massless spring, such that it is half submerged in a liquid of density σ at equilibrium position. When the cylinder is given a downward push and released, it starts oscillating vertically with a small amplitude. The time period T of the oscillations of the cylinder will be :

(1) Smaller than $2\pi\left[\frac{M}{(k+A\sigma g)}\right]^{1/2}$ (2) $2\pi\sqrt{\frac{M}{k}}$

(3) Larger than $2\pi\left[\frac{M}{(k+A\sigma g)}\right]^{1/2}$ (4) $2\pi\left[\frac{M}{(k+A\sigma g)}\right]^{1/2}$

Question Number : 41 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

In a transverse wave the distance between a crest and neighbouring trough at the same instant is 4.0 cm and the distance between a crest and trough at the same place is 1.0 cm. The next crest appears at the same place after a time interval of 0.4 s. The maximum speed of the vibrating particles in the medium is:

(1) $\frac{3\pi}{2}\ \mathrm{cm/s}$ (2) $\frac{5\pi}{2}\ \mathrm{cm/s}$

(3) $\frac{\pi}{2}\ \mathrm{cm/s}$ (4) $2\ \pi\ \mathrm{cm/s}$

Question Number : 42 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

This question has Statement-1 and Statement-2. Of the four choices given after the Statements, choose the one that best describes the two Statements. Statement 1: No work is required to be done to move a test charge between any two points on an equipotential surface. Statement 2 : Electric lines of force at the equipotential surfaces are mutually perpendicular to each other.

(1) Statement 1 is true, Statement 2 is true, Statement 2 is the correct explanation of Statement 1.

(2) Statement 1 is true, Statement 2 is true, Statement 2 is not the correct explanation of Statement 1.

(3) Statement 1 is true, Statement 2 is false.

(4) Statement 1 is false, Statement 2 is true.

Question Number : 43 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

The surface charge density of a thin charged disc of radius R is σ. The value of the electric field at the centre of the disc is $\frac{\sigma}{2\in_0}$. With respect to the field at the centre, the electric field along the axis at a distance R from the centre of the disc:

(1) reduces by 70.7% (2) reduces by 29.3%

(3) reduces by 9.7% (4) reduces by 14.6%

The gravitational field in a region is given by: $\vec{E} = (5N/kg)\hat{i} + (12N/kg)\hat{j}$ If the potential at the origin is taken to be zero, then the ratio of the potential at the points $(12\ \mathrm{m}, 0)$ and $(0, 5\ \mathrm{m})$ is :

(1) Zero (2) 1

(3) $\frac{144}{25}$ (4) $\frac{25}{144}$

Question Number : 45 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

A parallel plate capacitor having a separation between the plates d, plate area A and material with dielectric constant K has capacitance C_0. Now one-third of the material is replaced by another material with dielectric constant 2 K, so that effectively there are two capacitors one with area $\frac{1}{3}$ A, dielectric constant 2 K and another with area $\frac{2}{3}$ A and dielectric constant K. If the capacitance of this new capacitor is C then $\frac{C}{C_0}$ is

(1) 1

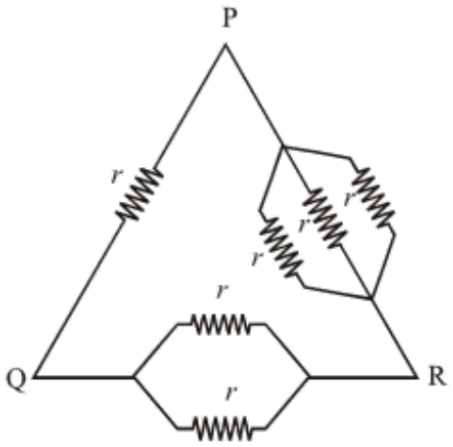

(2) $\frac{4}{3}$

(3) $\frac{2}{3}$

(4) $\frac{1}{3}$

Question Number : 46 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

Six equal resistances are connected between points P, Q and R as shown in figure. Then net resistance will be

maximum between :

(1) P and R

(2) P and Q

(3) Q and R

(4) Any two points

Question Number : 47 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

The earth's magnetic field lines resemble that of a dipole at the centre of the earth. If the magnetic moment of this dipole is close to $8 \times 10^{22} \mathrm{Am}^2$, the value of earth's magnetic field near the equator is close to (radius of the earth $= 6.4 \times 10^6$ m)

(1) 0.6 Gauss

(2) 1.2 Gauss

(3) 1.8 Gauss

(4) 0.32 Gauss

One of the two small circular coils, (none of them having any self - inductance) is suspended with a V-shaped copper wire, with plane horizontal. The other coil is placed just below the first one with plane horizontal. Both the coils are connected in series with a dc supply. The coils are found to attract each other with a force. Which one of the following statements is incorrect?

(1) Both the coils carry currents in the same direction.

(2) Coils will attract each other, even if the supply is an ac source.

(3) Force is proportional to d^{-1}

(4) Force is proportional to d^{-2}

Question Number : 49 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

A metal sample carrying a current along X− axis with density J_x is subjected to a magnetic field B_z (along z− axis). The electric field E_y developed along Y-axis is directly proportional to J_x as well as B_z. The constant of proportionality has SI unit.

(1) $\frac{m^2}{A}$

(2) $\frac{m^3}{As}$

(3) $\frac{m^2}{As}$

(4) $\frac{As}{m^3}$

Question Number : 50 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

When resonance is produced in a series LCR circuit, then which of the following is not correct?

(1) Current in the circuit is in phase with the applied voltage.

(2) Inductive and capacitive reactances are equal.

(3) If R is reduced, the voltage across capacitor will increase.

(4) Impedance of the circuit is maximum.

Question Number : 51 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

A series LR circuit is connected to an ac source of frequency ω and the inductive reactance is equal to 2R. A capacitance of capacitive reactance equal to R is added in series with L and R. The ratio of the new power factor to the old one is :

(1) $\sqrt{\frac{2}{3}}$

(2) $\sqrt{\frac{2}{5}}$

(3) $\sqrt{\frac{3}{2}}$

(4) $\sqrt{\frac{5}{2}}$

Question Number : 52 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

A printed page is pressed by a glass of water. The refractive index of the glass and water is 1.5 and 1.33, respectively. If the thickness of the bottom of glass is 1 cm and depth of water is 5 cm, how much the page will appear to be shifted if viewed from the top ?

(1) 1.033 cm

(2) 3.581 cm

(3) 1.3533 cm

(4) 1.90 cm

Question Number : 53 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

A thin glass plate of thickness is $\frac{2500}{3}\lambda$ (λ is wavelength of light used) and refractive index $\mu = 1.5$ is inserted between one of the slits and the screen in Young's double slit experiment. At a point on the screen equidistant from the slits, the ratio of the intensities before and after the introduction of the glass plate is :

(1) 2 : 1

(2) 1 : 4

(3) 4 : 1

(4) 4 : 3

Question Number : 54 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

The source that illuminates the double $-$ slit in 'double - slit interference experiment' emits two distinct monochromatic waves of wavelength 500 nm and 600 nm, each of them producing its own pattern on the screen. At the central point of the pattern when path difference is zero, maxima of both the patterns coincide and the resulting interference pattern is most distinct at the region of zero path difference. But as one moves out of this central region, the two fringe systems are gradually out of step such that maximum due to on wavelength coincides with the minimum due to the other and the combined fringe system becomes completely indistinct. This may happen when path difference in nm is:

(1) 2000

(2) 3000

(3) 1000

(4) 1500

Question Number : 55 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

This question has Statement-1 and Statements2. Of the four choices given after the Statements, choose the one that best describes the two Statements. Statement-1 : Out of radio waves and microwaves, the radio waves undergo more diffraction. Statement-2 : Radio waves have greater frequency compared to microwaves.

(1) Statement-1 is true, Statement-2 is true and Statement-2 is the correct explanation of Statement-1

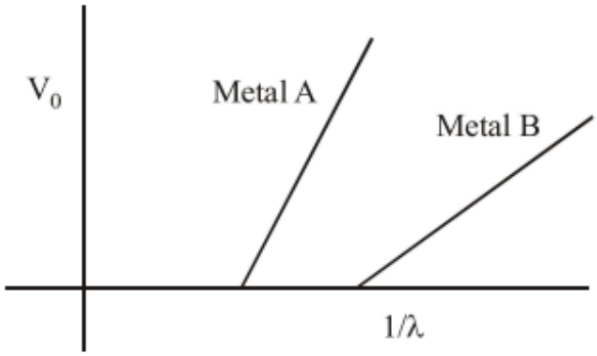

(2) Statement-1 is false, Statement-2 is true.

(3) Statement-1 is true, Statement-2 is false.

(4) Statement-1 is true, Statement-2 is true but Statement-2 is not the correct explanation of Statement-1

Question Number : 56 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

In an experiment on photoelectric effect, a student plots stopping potential V_0 against reciprocal of the wavelength λ of the incident light for two different metals A and B. These are shown in the figure.

Looking at the graphs, you can most appropriately say that:

(1) Work function of metal B is greater than that of metal A

(2) For light of certain wavelength falling on both metal, maximum kinetic energy of electrons emitted from A will be greater than those emitted from B.

(3) Work function of metal A is greater than that of metal B

(4) Students data is not correct

Question Number : 57 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

A copper ball of radius 1 cm and work function 4.47 eV is irradiated with ultraviolet radiation of wavelength 2500 $\mathring{A}$. The effect of irradiation results in the emission of electrons from the ball. Further the ball will acquire charge and due to this there will be a finite value of the potential on the ball. The charge acquired by the ball is :

(1) 5.5×10^{-13} C

(2) 7.5×10^{-13} C

(3) 4.5×10^{-12} C

(4) 2.5×10^{-11} C

Question Number : 58 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

A 12.5eV electron beam is used to bombard gaseous hydrogen at room temperature. It will emit:

(1) 2 lines in the Lyman series and 1 line in the Balmar series

(2) 3 lines in the Lyman series

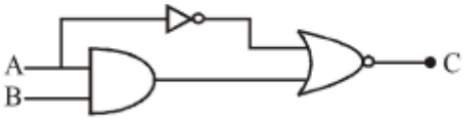

(3) 1 line in the Lyman series and 2 lines in the Balmar series

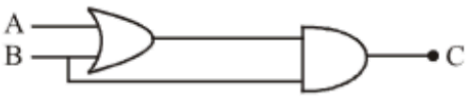

(4) 3 lines in the Balmer series

The ratio $\frac{K_p}{K_c}$ for the reaction $CO(g) + \frac{1}{2}O_2(g) \rightleftharpoons CO_2(g)$ is:

(1) $\frac{1}{\sqrt{RT}}$

(2) $(RT)^{1/2}$

(3) RT

(4) 1

Question Number : 74 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

What would be the pH of a solution obtained by mixing 5 g of acetic acid and 7.5 g of sodium acetate and making the volume equal to 500 mL ? $\left(K_a = 1.75 \times 10^{-5}, pK_a = 4.76\right)$

(1) pH = 4.70

(2) pH < 4.70

(3) pH of solution will be equal to pH of acetic acid

(4) $4.76 <$ pH < 5.0

Question Number : 75 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes Is Question Mandatory : No Single Line Question Option : No

Which one of the following arrangements represents the correct order of the proton affinity of the given species :

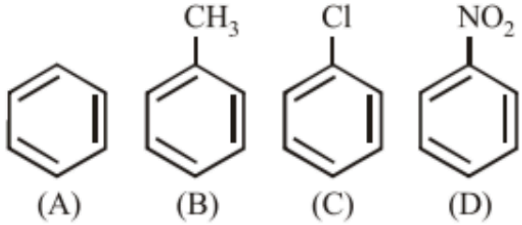

(1) $I^- < F^- < HS^- < NH_2^-$

(2) $HS^- < NH_2^- < F^- < I^-$

(3) $F^- < I^- < NH_2^- < HS^-$

(4) $NH_2^- < HS^- < I^- < F^-$
